Career Objective

Experienced developer with 3+ years of building efficient, high-performance web applications with good analyzing and problem-solving. Expertise in React.js, JavaScript, Node.js, and Web Components, with a passion for enhancing user experiences and continuously evolving technical skills and a passion for continuous learning in a fast-paced development environment.

Work Experience

Aptlogica Technologies.

Software Developer

January 2022 -to- Present

- **Project:** Google Pixel Simulator (ReactJS)
Description: Developed a Google Pixel Simulator for the official Pixel website, enabling users to explore and interact with device features for an immersive experience.
Skills: ReactJS, i18n localization, Context API, node.js scripts.
- **Project** Sgpulse Framework (Lit Web Component Library based JavaScript Framework)
Description: Developed the Sgpulse Framework, a lightweight JavaScript framework for e-learning, featuring interactive components (MCQs, Code Editors, Drag & Drop, etc.), XAPI integration, dynamic assessments, theme support, progress tracking. Activity-based learning plugins with lit web components, and improved user experience.
Skills: REST APIs, Web Components, state store/restore data, and XAPI integration with LRS, TypeScript.
- **Project:** Authoring App (ReactJS)
Description: Developed a ReactJS-based content editor, enabling instructors to create and edit courses using templates, dynamically generate assessments, template-based course creation, real-time data preview with the help of above Sgpulse Framework.
- **Project:** Review Tool (Annotation (ReactJS))
Description: Integrated a Review Tool for inline content editing and annotation, enabling content authors to suggest changes, track history, and manage multilingual updates. Features include API integrations, ReactJS, Redux Toolkit, and change tracking with GitHub/GitLab.
- **Project:** Adapt Framework Customisation (JavaScript, jQuery, Handlebars, Backbone.js)
Description: Customized the Adapt eLearning framework to meet e-learning needs, developing components, extensions.
